

From inspiration to prototype-ready in 10 minutes

SitePrompt is a Chrome extension wizard that walks you through distilling what you love about up to 3 design-inspiration sites into a structured brief — then hands you a PDF and three levels of Claude Design prompts so your prototype looks right from the very first try.

THE CHALLENGE

Most design briefs miss what actually matters

Designers and founders know exactly what they want their brand to feel like — they can point to other sites and say "I want something like that." But translating that into actionable direction for AI tools or developers is where things fall apart.

Without SitePrompt

- "Make it look like Linear" gives AI nothing to work with
- Vague color references lead to generic palettes
- Typography preferences are lost in translation
- Multiple revision cycles burn time and budget
- AI-generated prototypes miss the mark on first try

With SitePrompt

- Structured 6-step wizard captures all design intent
- Screenshot capture locks in the exact elements you love
- Typography, layout, color, motion — all documented
- Claude synthesizes it into precise, actionable prompts
- First prototype looks right — not 'close enough'

THE SOLUTION

A wizard that thinks like a designer

SitePrompt is a Chrome extension that opens as a side panel on any website. It guides you through a structured interview — capturing exactly what you love about each inspiration site — and then uses Claude to synthesize everything into a PDF design brief and three levels of Claude Design prompts.

Six focused steps — about 10 minutes

01

Your Brand

Name, purpose, claim to fame, color palette with pickers, logo upload, current site URL.

02

Inspiration Sites

Add up to 3 URLs. Capture full-page or drag-to-select region screenshots inline.

03

Distill Aesthetic

Choose your style (minimal/bold/warm/professional/playful), audience, and the emotion to convey.

04

Deep Dive Analysis

Per-site checkboxes for typography, layout, colors, imagery & motion — plus notes and region captures.

05

Review Brief

All collected data assembled into a proof with a readiness check before generation.

06

Get Your Output

PDF brief + 3 Claude Design prompt levels + consult CTA — all in one final screen.

KEY CAPABILITIES

- **Built-in Screen Grabber**
Drag to select any region of the current page — captures exact elements you love.
- **Smart Color Pickers**
Up to 6 brand colors with native pickers and one-click preset swatches.
- **Session Persistence**
Your wizard progress auto-saves locally — resume where you left off.
- **Claude-Powered Synthesis**
Sends your brief to Claude Sonnet 4.6 — designed by world-class UX strategists.
- **One-Click PDF Export**
Beautifully formatted PDF with all brief data, palette, and prompts.
- **Clerk Auth + Dashboard**
Sign in to save and revisit past briefs across sessions.

Three ready-to-use deliverables

Every SitePrompt brief generates three distinct outputs — from a shareable document to production-ready AI prompts.

OUTPUT 1

PDF Design Brief

A polished A4 document capturing your brand identity, design preferences, inspiration site analyses, color palette, and design synthesis. Shareable with any designer, developer, or AI tool. Includes the Claude prompts and the ServiceVision consult offer.

OUTPUT 2 — THREE PROMPT LEVELS

Claude Design Prompts

Quick Prototype

200–300 words. Paste into claude.ai/design for a landing page prototype in under 2 minutes.

Full Design System

400–600 words. Comprehensive site prompt with component library direction, spacing, and brand tokens.

Complete Specification

600–900 words. Full MVP spec including component states, responsive behavior, design tokens, and interaction patterns.

OUTPUT 3

Build-It-For-You Offer

Integrated call-to-action to schedule a free 30-minute consultation with ServiceVision — who turns SitePrompt briefs into real, deployed products at three price points.

SitePrompt is free — building is where ServiceVision comes in

The SitePrompt Chrome extension is completely free. ServiceVision offers three tiers to turn your brief into a live product.

\$999

Starter

Ideal for landing pages, portfolios, and concept validation.

- 1 landing page prototype
- Hero + 3 content sections + CTA
- Mobile-responsive
- Claude Design-generated
- Handoff-ready code

MOST POPULAR

\$4,999

Growth

For startups and businesses needing a full site or app prototype.

- Multi-page site or app prototype
- Full design system + component library
- Figma handoff file
- Clerk auth integration
- 2 revision rounds
- Deployed on Vercel

\$19,999

Enterprise

Full-stack MVP — from brief to deployed, investable product.

- Full-stack MVP build
- Database + API + auth
- Admin dashboard
- CI/CD pipeline
- 3 months support
- Investor-demo ready

"I spent 3 hours trying to describe my vision to an AI. With SitePrompt I was done in 12 minutes and the first Claude prototype was 90% there. The structured analysis of my inspiration sites was the key — I never would have thought to break it down that way."

INSTALL IN 3 STEPS

No Chrome Web Store required

1

Download & Unzip

Get
siteprompt-extension-v0.1.0.zip
from
github.com/dbbuilder-org/siteprompt
and unzip to get the dist/
folder.

2

Enable Dev Mode

Navigate to
`chrome://extensions` and
toggle Developer mode ON
in the top-right corner.

3

Load Unpacked

Click Load unpacked '
select the dist/ folder. Pin
SitePrompt to your toolbar.
